

Tires Prefer To Be Cool!

Ride-On™ Tire Ballast & Sealant Formula (TB&S) is a specially formulated tire ballast and sealant concentrate for use in the tires and rims of agricultural, industrial, mining, and construction equipment. Ride-On TB&S is a great alternative to traditional ballast liquids that are environmentally hazardous, corrosive and harmful to tires and wheels. Additionally, Ride-On TB&S is a tire sealant that prevents flats and seals punctures from objects up to 1/4" in diameter. TB&S reduces underinflation due to air loss from porosity leaks and from o-rings, vent holes, and bead seats.

Features

- **Reduces rim replacement and reconditioning costs** - Ride-On TB&S contains corrosion inhibitors that help reduce rim scale and corrosion buildup. Ride-On TB&S lowers operating and maintenance costs by reducing the need for rim and bead cleanup and reconditioning.
- **Water dispersible** - Washes out with plain water leaving no residue. Ride-On TB&S will not interfere with the application of boots, section or tire plug and patch repairs.
- **Safe to use** - Non-flammable, non-hazardous, non-toxic, biodegradable. Contains no Glycols.
- **Lowers labor costs** - Ride-On TB&S helps with mounting and de-mounting of off-road, industrial, and agricultural tires. High heat can cause a tire to weld itself to a rim, resulting in hours of labor spent trying to break free the tire bead and ultimately resulting in damage to the tire and rim.
- **Suitable for all weather conditions** - TB&S is a concentrated ballast and sealant solution designed to be diluted 3 to 1. Undiluted, the TB&S freeze point is 32F. Freeze points as low as -40F can be achieved when diluted with the proper ratio of glycol and water.
- Available in convenient 5-gallon pails, 55-gallon drums, and 275 gallon totes.

A Reputation You Can Ride-On

Inovex Industries, Inc. has earned its reputation by providing the world's most advanced tire sealing solutions to commercial and professional fleets. Ride-On™ TPS is currently used in more than 250,000 applications by municipalities, counties, government agencies and hundreds of commercial fleets.

Ride-On™ TPS is available in nine formulations for every tire application. Try our **Commercial High Speed (CHS)**™ formula for over-the road equipment traveling at speeds in excess of 30 mph. For more severe applications and extreme off-road conditions, where downtime is critical, we recommend the use of our Ride-On **Heavy Duty Off-Road (HDOTR)**™ sealant or our **Tire Conditioner & Sealant (TC&S)**™ industrial sealant. Ride-On™ TPS is also available for motorcycles and bicycles.

Manufactured in the USA.
